64 CuFt

WORK SURFACE:
Tops are constructed of 2 " thick built-up particleboard core Top surface is laminated with a .050 " thick high pressure plastic laminate sheet and bottom surface laminated with a backing sheet not less than . 020 " thick for balanced construction. Two long edges of the rectangular tables will be banded with a $2^{\prime \prime}$ wide x $1^{1 / 4^{\prime \prime}}$ thick solid hardwood external edge and tapered creating a 7 " chamfered knife edge. The side shall be externally banded with $1 / 8^{\prime \prime}$ thick x 2 " high solid hardwood. All edges are eased.

## SUPERSTRUCTURE:

$23^{3 / 4} 4^{\text {" high side panels, mid panel, back panels and shelves }}$ constructed from $3 / 4^{4}$ veneer plywood. Top of the side and back panels shall be banded with a ${ }^{3 / 4} 4^{\text {" thick } \times 2 \text { " high solid, the two }}$ vertical edges shall be banded with $1 / 8^{"}$ thick hardwood. Panels shall be tapered down from a top dimension of $17^{\prime \prime}$ wide to $20^{\prime \prime}$ wide at the bottom. The center of the panel is routed to accept $a^{1 / 8 " ~ d e e p ~} x^{3 / 16 " ~ w i d e ~ s o l i d ~ e b o n y ~ i n l a y . ~ F i x e d ~ s h e l f ~} 8^{3 / 4} / 4^{\prime \prime}$ deep shall be fitted 13 " clear above table

## END PANELS:

Panel frame construction consists of a $3^{\prime \prime}$ thick built-up particleboard core with plain sliced veneer interior face. End panels shall be designed with a $4^{1 / 4} 4^{\prime \prime}$ wide $\times 1 / 2^{\prime \prime}$ deep indentation separating two raised panel faces. The center of the panis Front face of panels shal be csigned using
 around the perimeter meeting at mitered corners Panels are framed on top and two vertical sides with $1 / s^{\prime \prime}$ thick x $21 / z^{\prime \prime}$ wide solid hardwood. Podium base construction consists of a $3^{1 / 2 "}$ "thick built-up particleboard core with $1 / 4^{\prime \prime}$ thick x $4^{\prime \prime}$ high solid hardwoed mitered on four sides of the panel and throughout the indentation.

## WORK SURFACE:

Tops are constructed of 2 " thick built-up particleboard core Top surface is laminated with a .050 " thick high pressure plastic laminate sheet and bottom surface laminated with a backing sheet not less than . 020 " thick for balanced construction. Two long edges of the rectangular tables will be banded with a $2^{\prime \prime}$ wide $\times 1^{1 / 1 / 4 " t h i c k ~ s o l i d ~ h a r d w o o d ~ e x t e r n a l ~}$ edge and tapered creating a 7" chamfered knife edge. The rear and sides shall be externally banded with $1 / 8^{\prime \prime}$ thick $\times 2$ " high solid hardwood. All edges are eased.

## WOOD DIVIDERS:

Sloped side dividers constructed of $3 / 4$ " thick $\times 8$ " high solid hardwood and back divider constructed of $3 / 4^{\prime \prime}$ thick x $7^{3 / 4} 4^{\prime \prime}$ high veneer particleboard, top edge banded with $1 / 4^{\prime \prime}$ external hardwood.

## END PANELS:

Panel frame construction consists of a 3 " thick built-up particleboard core with plain sliced veneer interior face End panels shall be designed with a $4^{1 / 4^{\prime \prime}}$ wide $x^{1 / 2 "}$ deep indentation separating two raised panel faces. The center of the panel is routed to accept a $1 / 8^{\prime \prime}$ deep $x^{3 / 16 " ~ w i d e ~ s o l i d ~}$ ebony inlay. Front face of panels shall be designed using rift sawn veneers $Z^{\prime \prime}$ " wide running horizontally and vertically around the perimeter meeting at mitered comers. Panels are solid hardwood Podium base construction consists of a $31^{1 / 2 "}$ thick buit up paticlebeard core with $1 /{ }^{\prime \prime}$ thick 4 4" high solid hardwood mitered on four sides of the panel and throughout hardwood mitered on four sides of the panel and throughout

WORK SURFACE HEIGHT:
Table heights of $25^{\prime \prime}$ (children), 27" (youth), and 32" (wheelchair) are available by request.

## ELECTRICAL ACCESSORIES

Each seating position shall receive a 3" diameter black plastic grommet and a black metal $j$-channel for wire management.

## PALMIERIC

## DESCRIPTION

## WORK SUREACE

Tops are constructed of 2 " thick built-up particleboard core Top surface is laminated with a .050 " thick high pressure plastic laminate sheet and bottom surface laminated with a backing sheet not less than 020" thick for balanced construction. Two long edges of the rectangular tables will be banded with a $2^{\prime \prime}$ wide x $1^{1 / 4} 4^{"}$ thick solid hardwood external. edge and tapered creating a 7 " chamfered knife edge. The side shall be externally banded with $1 / 8^{\prime \prime}$ thick $\times 2$ " high solic hardwood. All edges are eased.

## END PANELS:

Panel frame construction consists of a 3 " thick built-up particleboard core with plain sliced veneer interior face. End panels shall be designed with a $4^{1 / 4^{\prime \prime}}$ wide $\times 1 / 2^{\prime \prime}$ deep indentation separating two raised panel faces. The center of the panel is routed to accept a $1 / 8^{\prime \prime}$ deep $\times 3 / 16$ wide solid ebony inlay. Front face of panels shall be designed using rift sawn veneers 2 " wide running horizontally and vertically around the perimeter meeting at mitered corners. Panels are framed on top and two vertical sides with $1 / 8^{\prime \prime}$ thick $\times 2^{1 / 2 "}$ wide solid hardwood. Podium base construction consists of a $3^{1 / 2 \prime} 2^{\prime \prime}$ thick built-up particleboard core with ${ }^{1 / 4 "}$ "thick $\times 4$ " high solid hardwood mitered on four sides of the panel and throughout the indentation.
